Java Developer | AWS Cloud | Biometrics

Summary

Systems Engineer with experience in problem analysis, software development, data analysis, design solutions in cloud and biometrics.

Excellent communication skills and able to work alongside support teams to define and refine new functionality with new technologies (AWS) used by different sectors (banking, real state, biometrics) using full life software cycle with different programming languages.

Management of databases and performance in different levels (Software, Solution, ETL)

Passionate about performing cloud solutions and data analysis in social networks. (Certified as Big Data Scientist - Arcitura)

Creative and I demonstrate the initiative to assume responsibilities.

Core Competencies

- Java
- Python
- Docker
- Shell
- SQL / NoSQL (
 - Oracle
 - SQL Server
 - PostgreSQL, MySQL)
 - Hibernate
 - Git / SVN
 - XML / JSON
- Linux
- Windows
- AWS
 - Batch
 - SSM
 - DynamoDB
 - SQS
 - SNS
 - CloudWatch
 - Lambda
 - Cognito
- CircleCI
- Jenkins
- SonarQube
- Cloud Solution Design
- MicroServices
- Problems Research
- Data Analysis

Other Competencies

- R
- JavaScript
- C#
- Dart
- NoSQL
 - MongoDB, RavenDB
- LocalStack
- HikariCP
- TensorFlow
- Google Analytics
- Fivetran
- Looker Platform

Work experience

2018 (Aug) - 2020(Apr) Java Developer

Globant

(2019/Aug - 2020/Apr)

With this client, my role is Java Developer(Bank GNB Sudameris)(Present)

- Responsible for the development of a next-gen platform.

(2018/Aug - 2019 - Aug)

With this client, my role was Data Architect (Corcoran Group)

- Responsible for the development of the connectors and of multiples data sources in order to integrate with different platforms.
- Responsible for data analysis in the Looker Platform in order to generate reports for managers.
- Responsible for the maintenance and performance of many databases.

2015 (Dec) - 2018 (Aug) Development Analyst

Adecco - IDEMIA (Colombia)

- Responsible for the development, modification, and integration of applications that are part of new or maintenance solutions for Morpho clients at the level of the Latin America and the Caribbean region. The scope of its functions also includes the internal requirements of software development.
 - Establish, document and update the procedures of the area and the development standards in a clear and concise manner, covering all aspects available in the functions of the area.
 - Perform the design and development of the information system that meets the requirements of the solution applying the development standards adopted by the Company.
 - Ensure compliance with the Business Methodology.

2014 - 2015

Development Engineer

ODI Ltda - Bank Popular (Colombia)

- The Development Engineer is responsible for the analysis, development and maintenance of the financial applications associated with the popular bank.

2009 - 2010

Developer

TATA CONSULTANCY SERVICES (Colombia)

- Support Developer Team in different projects in JAVA/Oracle (SENA Intership)

Clouds & Frameworks

AWS

DynamoDB, SQS, SNS, Cognito, Lambda, LocalStack, Docker

Spring

Java-based framework

Mule Framework

Java-based enterprise service bus

Education

2010 - 2016

University El Bosque (Engineer Degree)

Behaviour of Symptoms on Twitter

With the amount of data available on social networks, new methodologies for the analysis of information are needed. Some methods allow the users to combine different types of data in order to extract relevant information. In this context, the present paper shows the application of a model via a platform in order to group together information generated by Twitter users, thus facilitating the detection of trends and data related to particular symptoms. In order to implement the model,

an analyzing tool that uses the Levenshtein distance was developed, to determine exactly what is required to convert a text into the following texts: 'gripa'- "flu", "dolor de cabeza"- "headache", 'dolor de estomago'- "stomachache", 'fiebre'- "fever" and 'tos'- "cough" in the area of Bogota. Among the information collected, identifiable patterns emerged for each one of the texts.

- 2013-2014

2008 - 2010

SENA (Technologist degree)

HealthSoft

The mission of "HealtSoft" is to consolidate a virtual medical community that allows the interaction between medical personnel from different latitudes, which will allow us to provide through their interaction, diagnoses to diseases of difficult opinion or clinical prescription by means of the search for symptomatology in the various registered medical records.

2002 - 2007

Technical Institute Francisco José de Caldas (Bachelor Degree)

High School

District education institution. Basic secondary and middle
